

Case Study: Integrating Technology in a Small, Rural School

Timeline: 2010 - 2011

Client. Atomic Learning

The Challenge. Providing Cost Effective Technology Training in a Small School Environment

The Solution. When faced with this challenge, Seiling selected Atomic Learning as a central component for its technology professional development. The online delivery provided an easy-to-use, cost-effective solution for helping teachers learn technology.

Marquita Seifried provides a good illustration of how Seiling has benefitted from the adoption of the Atomic Learning online technology training solution. When faced with a technology challenge, Marquita runs to Atomic Learning. "I use it a lot if there is a technology tool I need to learn", said Ms. Seifried. "I particularly like the Web 2.0 tutorials. I have used a wide range of units and modules." Marquita is confident that Atomic Learning has helped improve student learning. "I believe that the students whose teachers use Atomic Learning do better academically than students whose teachers do not take advantage of the Atomic Learning tools."
